PROLUBE

LUBRICANT FOR DOCTOR BLADE CHAMBER SEALS

PROLUBE is a professional lubricant for doctor blade chamber seals. It can be used to ensure optimal adhesion between seal and Anilox roller while reducing friction.

We also recommend to use it on the inferior part of any doctor blade before inserting, thus making its installation easier and avoiding any dry residual ink on the seal, which would compromise its functioning.

100 ml e PE

WARNING:

Causes serious eye irritation.
IF IN EYES: rinse cautiously with water and call your doctor.
Do not swallow. Keep out of reach of children.
